

# Bosser Project

**Team:** Bar Doitch, Ofir Cohen, Tal Levi, Ohad Yaakov.

# Changes since start of project:

- The first major change since the start of the project is:

Two weeks ago we had a several misunderstandings with our first client, the college provide us a new client with a few new requests.

- Accessible site

# Risks:

Risk's type	Risk	Likely to occur	Response	Severity	Actually happened
Technology	New technology and unfamiliar environment	Medium	Training and knowledge, getting familiar with the development tools before start working on it.	High	Happened what we expected. We getting familiar with development during work.
Schedules	Tight Schedules	Medium	Building an effective schedule management plan, set goals and divide tasks between the team	Medium	We build an effective schedule, and we manage to keep it up.
Customer expectations	Customer's Requirements are not clearly defined and understood	High	Defining clear boundaries and work closely with the customer	Medium	Customer expectation were high and can not be realistic . The work with this customer ended.
Resources	Providing a new platform that doesn't exist, we cannot rely on resources that already in use	Low	knowing the needs and capabilities of our system and get inspired by existing systems	Medium	Our use cases were clearly defined. We managed to handle this risk.
Team members	Lack of coordination and schedules between group members	Medium	Set up a weekly meetings and a member team that can divide tasks between the team	Low	We set up weekly meetings and divided tasks.

# Testing :

- Check toolbar functionality-

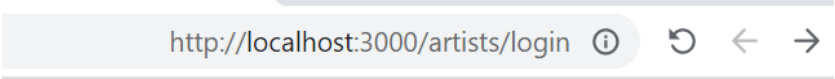

Test steps: 1.Lunch application **success**

2.Click on 'Artists' **success**

3.Click on any artist **success**

4.Click on sign in **failed (incorrect URL)**

**How we fixed it? We added '/' in this URL link path**

```
<NavBtnLink to="login">התחברות</NavBtnLink>
```

```
<NavBtnLink to="/login">התחברות</NavBtnLink>
```

- Supporting responsive site-

Test steps: 1.Lunch application **success**

2.Check functionality for different devices. (side bar for iPhone 6,7,8 **failed** )

**How we fixed it? We added cases in CSS file.**

# What did we learn as a team?

We learn as a team that is very important to know every member strengths and weaknesses at the beginning of the project.

Also, it is very important to know how to divide our time properly and to be focus on the project purpose.

Learn how to work with new platforms (GitHub, React, Firebase).

Listen to each other, be patience, help and support each other.
